Projects

Career Builder Web-Based Platform: [Career Builder website](#)

Technologies used: HTML, CSS, JavaScript, ReactJS, NodeJS, and Express.js

Project Description:

- CareerBuilder is a full-stack web application that streamlines job searching and recruitment processes.
- The platform supports two main user roles: job applicants and companies.
- Applicants can create detailed professional profiles, including personal information, work experience, education, skills, certifications, projects, and social links.
- Companies can also register, manage their profiles, and post job openings.
